

# Design System — Alètheia Srl

Documento estratto automaticamente da `styles/globals.css`, `tailwind.config.js`, `pages/` e `components/`.  
Mockup Next.js 13 + Tailwind CSS, ispirato al tema iTeach. Strategia dark mode: classe `dark` su `<html>`.

Brand color principale: `#008C95` (turchese) — invariato tra light e dark.  
In dark mode il verde brand `#10B981` sostituisce spesso il turchese per accenti/testo.

## 1. Tipografia

### Font family

| Ruolo             | Font                                                                                        | Sorgente                                                     | Note                                                                                       |
|-------------------|---------------------------------------------------------------------------------------------|--------------------------------------------------------------|--------------------------------------------------------------------------------------------|
| Corpo / UI        | Nunito                                                                                      | Google Fonts (pesi 300–900)                                  | <code>font-family: 'Nunito', sans-serif</code>                                             |
| Titoli (h1–h6)    | Viga                                                                                        | <code>next/font/google</code> , var <code>--font-viga</code> | unico peso 400; <code>text-transform: uppercase</code> ; <code>font-synthesis: none</code> |
| Fallback Tailwind | <code>font-sans</code> → Nunito · <code>font-heading</code> / <code>font-viga</code> → Viga | <code>tailwind.config.js</code>                              |                                                                                            |

⚠ Regola globale: `h1,h2,h3,h4,h5,h6 { font-weight: 400 !important }`. Tutte le utility/inline di peso elevato sui titoli (es. `font-extrabold`, `font-weight:800`) vengono **forzate a 400** per evitare il faux-bold su Viga.

## 10. Note di accessibilità (WCAG)

- Testo normale ≥ **4.5:1**, testo grande ≥ **3:1**.
- Colori testo commentati nel CSS con il rapporto di contrasto (es. #374151 7:1 su bianco, #F8FAFC 14:1 su #003134 ).
- #006873 usato al posto del turchese puro su sfondi chiari per garantire 5.2:1.
- Focus visibile: .category-card:focus-visible { outline: 3px solid var(--primary) } , e focus-visible:outline-[#008C95] sulle card news.
- Dark mode: ogni bg-white ha la controparte dark:bg-dark-card , ogni text-slate-900 ha dark:text-white ; brand #008C95 invariato.

Documento generato per documentazione interna del design system. Per modifiche ai token, aggiornare `styles/globals.css` (CSS variables) e `tailwind.config.js` (colori `dark-bg` , `dark-card` , testi WCAG).
